Profile

I am an experienced project manager with over 1000 hours of experience in managing software development. I come from an engineering background with a thorough understanding of tech stacks, agile methodology, and cognitive biases.

Experience

Project Manager, Bony Polymers, Faridabad – 2016-Present
Since past December, I've been managing product development of Instafeed at Bony Polymers. I manage a team of a total 20 devs and dev-ops, along with marketing people, ensuring quality product and team satisfaction, even under tight deadlines.

Junior Project Manager, Abacus Desk IT, Faridabad – 2016
I worked for about 9 months at Abacus Desk, handling dev teams working on Ionic projects. The experience I gained here was invaluable, & I learned the most important thing about management - managing pressure working under strict deadlines.

Internship, NCR IT Solutions, Faridabad – 2015-2016
In the third year of my B.Tech course, I joined NCR IT Solutions as an intern. Here I learned about all the ins and outs of real world development processes.

Education

MDU, Rohtak, Haryana – B.Tech (Computer Science, 74%), 2016
HBSE, Bhiwani, Haryana – Senior Secondary (83%), 2012
HBSE, Bhiwani, Haryana – Secondary School (89%), 2010

Skills

I am good with people, & I understand the cognitive biases that affect us all & ways to navigate around those. The single goal that I have in mind while managing a team is to make each member understand his or her importance in the project & I deliver on time.
